Academic and professional experience

Software engineer – Kaizen Solutions (KZS)

10/2021 – Current **Technical leader**.
Contracting work for Thales AVS

Responsibilities: Technical leader on a data collection, transformation and exploitation project — Designing the software architecture supporting new features — Maintenance and upgrades of the infrastructure to support the client's requirements — Management of the project's operational tasks — AWS cloud and Kubernetes (Helm) developer — Code owner of the embedded data collection agents

Languages: C++, Python 3, Terraform, Helm

Technologies: ElasticSearch, Grafana, Redis, Fluent-Bit, Metricbeat, Keycloak, Jenkins

Environment: Windows, Linux, Docker, Kubernetes (K8s), AWS, Datadog

Methods and integration: Git, Azure DevOps, GitLab

Postgraduate education – Université Grenoble Alpes

09/2020 – 08/2021 **Temporary Lecturer and Research Assistant**.

Summary: Teaching at university and continuing Ph.D preparation (see below).

Teaching: Advanced databases (9h) — Relational databases and applications (84h) — Software development basics: modularization, tests (67.5h) — Automata and languages (30h)

09/2017 – 08/2020 **Ph.D preparation: controlling the appearance of stochastic procedural textures**.

Summary: Development of optimized procedural texture generation methods and applications in additive manufacturing.

Responsibilities: System administration of the team's computers — Participation in technical and scientific presentations — Organization of the annual team seminar

Technologies: Rust, C++17, CMake, OpenGL 4, CUDA, Julia, Mathematica, Ansible, Docker

Teaching: Software architecture (41h) — Advanced databases (26h) — Algorithms and imperative programming (80h)

Graduate education – Grenoble INP – Ensimag

2014 – 2017 **Engineering diploma in applied mathematics and computer science**.
Information systems engineering major

2017 **Master internship: Studying artifacts arising from procedural textures given paradoxical requirements**.
Laboratoire Jean Kuntzmann — MAVERICK team

Summer 2016 **Engineering internship: Translation system for software products**.
Eaton

2016 **Introduction to do research: Rendering mountain panoramas**.
Laboratoire d'Informatique de Grenoble – IIHM team

Undergraduate education

2012 – 2014 **PTSI Preparatory class**, *Lycée Rouvière*.

Skills

Languages	French (native), English (fluent, TOEFL iBT score: 106/120)
Programming languages	Rust, C++17, Python 3, CMake, Make, C, Bash, GLSL, Julia, Mathematica, Perl, SQL, Ruby, JavaScript, TypeScript, Java
Software	Cloud infrastructure (AWS) — Infrastructure as Code (Terraform) — Container orchestration (Kubernetes, Helm) — SQL Databases (PostgreSQL, MySQL) — NoSQL Databases (Redis, ElasticSearch) — Version control systems (Git) — Continuous integration (GitLab CI, GitHub Actions, Jenkins) — Continous deployment (ArgoCD) — Testing and validation (unit, integration, fuzzing, coverage) — System administration and deployment (Ansible, Docker, Linux, Cloud, Networks, Virtualization) — Graphical APIs (OpenGL 4) — GPU (CUDA) and real-time computing, optimization (measuring, profiling, cache, etc.) — Distributed computing (OpenMPI) — Open-source development model and licences

Publications

International conference with review committee

2020 **Freely orientable microstructures for designing deformable 3D prints**.
SIGGRAPH Asia 2020 – ACM Transactions on Graphics
Thibault Tricard, Vincent Tavernier, Cédric Zanni, Jonàs Martínez, Pierre-Alexandre Hugron,Fabrice Neyret, Sylvain Lefebvre
https://hal.inria.fr/hal-02524371v3

2019 **Making Gabor Noise Fast and Normalized**.
Eurographics Short Papers
Vincent Tavernier, Fabrice Neyret, Romain Vergne, Joëlle Thollot
https://hal.inria.fr/hal-02104389

National conference

2018 **Gabor Noise Revisited**.
j · FIG - Journées Françaises d'Informatique Graphique
Vincent Tavernier, Fabrice Neyret, Romain Vergne, Joëlle Thollot
https://hal.archives-ouvertes.fr/hal-01926451

Training courses attended

Technical **Introduction to parallel computing**, 36h.
Notions in distributed computing, OpenMPI, OpenMP and datacenters.

Introduction to the Julia language, 8h.
Getting started with Julia for scientific computing.

Pedagogy **Managing student behavior in class**, 21h.
Relation between pedagogy and behavior, methods in class management.

Personal projects

Since 2021 **Writing articles for my blog**, *Topics: programming, electronics, etc.*.
https://vtavernier.github.io/posts/

Since 2020 **glslt**, *Function template compiler for GLSL*.
https://github.com/vtavernier/glslt

Since 2020 **glsl-lang**, *LALR parser for GLSL*.
https://github.com/vtavernier/glsl-lang

And many others: https://vtavernier.github.io/projects/
